

It's easy to get started.

Let's join Alex (and her dog Max) on an ecommerce shipping adventure!

1

Orders for her socks are flying in—Awesome! However, it's too much for Alex (and her dog Max) to handle alone. She needs help.

2

Alex visits **PortLogisticsGroup.com** and learns how we can help make her life easier. She decides to come aboard.

3

On Friday we connect her shopping cart (she uses Shopify) to Whiplash instantly.

4

Over the weekend, we move her goods into our warehouse.

5

On Monday, Alex reclaims her garage and starts managing her business in the Whiplash system—making order changes, reviewing inventory, emailing customers, (and playing with Max).

7

Drew inserts a personalized note from Alex and wraps each order with branded gift wrapping and a bow. Then he packages them according to Alex's specifications, adds a shipping label and then they're off to the customers.

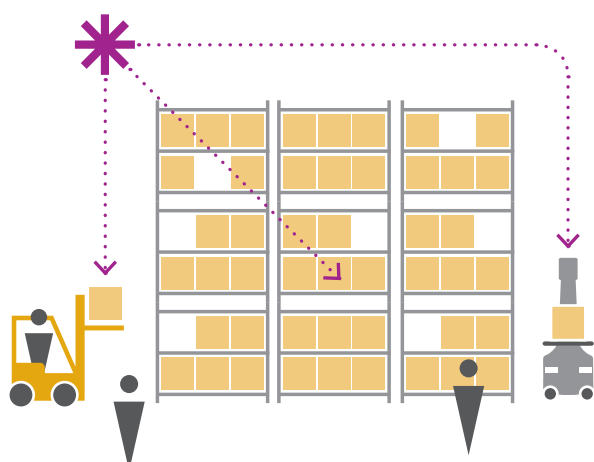

8

In 2 days, customers are pumped to get their new socks! Meanwhile, Alex and Max are enjoying a game of frisbee!

6

Order by order, Drew at PLG begins processing each one for shipment. Items are retrieved from the picking locations with the help of a Locus robot (these things are cool).

Ready to knock your customers' socks off?
