Port Logistics Group Launches Redesigned Website

New online presence reflects PLG's growth and showcases client success stories

HOUSTON, Oct. 18, 2011 /PR Newswire/ -- Port Logistics Group (PLG), the nation's leading provider of gateway logistics services, today announced the launch of an entirely redesigned website at www.portlogisticsgroup.com.

The new site reflects PLG's recent growth and geographic expansions, and also signals the launch of PLG's integrated national brand. The site features expanded service and location information, case studies, and new customer testimonials.

"We wanted our web presence to better reflect the great work our people do for our customers across the country," said Greg Morello, Chief Marketing Officer for PLG. "We also wanted to give visitors a visual depiction of the broad spectrum of services and facilities we offer. This new site showcases our credentials as a leader in retail logistics services at the major US gateways."

PLG was formed in 2008 through the acquisition and integration of three leading regional logistics providers. Led by industry veteran Bob Stull and backed by Austin Ventures, a \$3.9 billion private equity firm that provides growth capital for successful supply chain management companies, PLG has quickly become the leading provider of port-based logistics services.

ABOUT PLG: Port Logistics Group is the nation's leading provider of gateway logistics services, including value-added warehousing and distribution, transloading and cross-docking, vendor consolidation and national transportation. With nearly 4 million square feet of warehouse space strategically located in and around major North American ports, PLG provides the critical link between international transportation and the "last-mile" supply chain.
